

LEO Edge Architecture - One Page Summary

System Block Diagram

LEO Edge Architecture - System Block Diagram

Regime map: best architecture by rate/contact

Key Metrics (median across sweep)

Architecture	TFUP (s)	TCP (s)	Process Energy (J)	Tx Energy (J)	Total Energy (J)
A0_GROUND_ONLY	300.0	300.0	0	7500	7500
A1_COMPRESSED_FULL	188.0	188.0	300	4200	4500
A2_QUICKLOOK_FIRST	13.2	58.8	30	1420	1450
A3_ROI_FIRST	76.0	144.0	300	3100	3400
A4_PROGRESSIVE	20.0	106.7	300	2167	2467

Notes: TFUP = time to first useful product; TCP = time to complete product.
Metrics are medians over the rate/contact sweep from frozen v1 results. System diagram and regime map are from fig01 and fig04.
